Re: Credits to Account No. 104699921

Dear Mr. Bass,

I appreciate the opportunity to speak with you recently. Sparklight strives to provide quality service to every customer and regrets that you experienced issues with your Internet service.

As you know, Sparklight has already issued a total of $913 in credit to your account. We are still prepared to offer another $487 credit to settle any outstanding claims related to your previous Internet issues. Your current plan costs $125 per month and our 100 Mbps plan costs $55 per month. So, between the credit you already received and the additional credit of $487, your account would effectively only be charged as though you were on the 100 Mbps plan for the 20 months you experienced difficulties with your Internet speeds. As I mentioned during our previous conversation, Sparklight plans are not calculated on a per-Mbps basis. Indeed, this is not industry practice as a whole.

If you would like to discuss the additional credit in further detail, I would be happy to do so. Feel free to contact me at your earliest convenience and hopefully we can achieve full resolution on this matter.

Kind regards,

Cheryl Goettsche
