P. 5 2018 JPEG LEADERSHIP

About the Junior Professionals & Executives Group (JPEG)

JPEG is a young professionals network created to help legal and financial professionals under 40 years of age, or with less than 5 years of industry experience, gain exposure, and opportunities to career-building relationships through mentorship, collaboration with peers of all generations, as well as professional development and leadership opportunities.

JPEG was launched in August 2013 and currently has over 120 members, and is the second largest practice group in the ALFN. JPEG helps young professionals who may need direction toward volunteer opportunities and networking at the national level where the competition is fierce for the few slots that offer career development, exposure and positioning. JPEG coordinates networking mixers, regular teleconferences, webinars, and publishes an annual profile of emerging leaders, while operating as a platform for young professionals to access other leadership roles within the Association and to position themselves as subject matter experts through authorship and education.

JPEG was awarded a Gold Power of A award from the American Society of Association Executives (ASAE), recognizing JPEG as one of the most innovative association programs in the country.

About Picture the Future

The Picture the Future program is one of the ALFN's most highly sought after opportunities, and the competition gets tougher each year. All nominations were received during a two-week period from attorney-trustee and associate members, as well as from mortgage servicers. Individuals could either self-nominate and/or be nominated by a third-party. Several candidates had multiple nominations and provided information that attests to the impact these young leaders are making in our industry and their communities through education, volunteerism, entrepreneurship and continued leadership.

Candidates undergo a blind review by our committee so that they can be judged solely on the merits of their applications. All references to firm or company names, individual names, gender or other identifiers are removed prior to being reviewed by the committee. With more nominations received than ever before, the review committee had a difficult task in selecting the twelve award recipients. The individuals that were selected now join a growing and very select group of young professionals to be recognized with this award.

“

I attribute my career success to the guidance of an incredible set of mentors – something lacking in our industry. Though I am honored to serve as a frequent speaker on industry panels, my greatest contribution is paying it forward” to current law students, industry newcomers, existing contacts or those in transition. Whether it is dialoging on tactical questions about recent law changes, or engaging in broader strategic-based discussions, I relish being an industry resource and serving as a sounding board for others.”
